Brentside Knowledge Organiser - Humanities/Geography

Year: 1 Autumn	Topic: Where do the leaves go in the winter?	National curriculum: identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles

What I should already know:

There are different seasons.
That each season has different types of weather.
We wear different types of clothes depending on the weather.
That the are 12 months in a year.

What I should know at the end of the topic:

|	
	I will understand why leaves fall of the trees
	I can Identify the 4 seasons, and which months are in each season
	I can identify facts about each season including which season has the shortest and longest day light, which season do flowers begin to grow. Etc
	I can make predictions based on information from weather forecast and to understand some symbols needed in a forecast.
	I w9ill understand techniques do meteorologists use to predict the weather.
	I can explain the changes that occur during the seasons based on trees.

Timeline: What are the 4 seasons, which months are in each seasons, why do leaves fall in the Autumn, what changes occur in weather and nature in the seasons, what is a meteorologists job, what information can you use to predict the weather.

Maps/Diagrams/Artefacts

Vocabulary

Seasons	The cycle of weather changes is divided into four parts, known as the **seasons**. The four **seasons** are winter, spring, summer, and autumn, or fall.
Weather	**Weather** is what the sky and the air outside feel and look like.
Meteorologist	A meteorologist is a person whose job it is to forecast the weather.
Forecast	A prediction of what the weather will be like
