

Meet Your TEACHER

INTRODUCING

Miss Munir

ALL ABOUT ME

Hi my name is Miss Munir. I was born and raised in West London and spent a few years living in Cambridge before returning to London. I have worked with children for many years and am passionate about helping them grow in confidence, discover their strengths and reach their full potential. Outside of school, you'll often find me at the gym, watching cricket, exploring different cuisines, travelling to new countries or spending quality time creating lasting memories with my family and friends.

In 4 Red, we will create a happy, caring and inspiring classroom where every child feels valued, encouraged and excited to learn. I believe that every child has unique talents and strengths, and together we will celebrate every achievement, encourage one another and strive to be the very best we can be. One of the most rewarding parts of teaching is seeing children believe in themselves, grow in confidence and discover just how much they can achieve. I want every child to develop a lifelong love of learning and come to school each day feeling happy, supported and ready to succeed. I am incredibly excited to get to know every member of 4 Red and their families, and I look forward to an academic year filled with curiosity, creativity, laughter, memorable experiences and success. Together, we will build wonderful friendships, create lasting memories and make this a year to remember.

SUBJECTS I LIKE TO TEACH

I enjoy teaching all areas of the curriculum, as every subject offers children the opportunity to discover new interests and develop valuable skills. However, I particularly enjoy teaching Science and Maths. I love seeing children's curiosity come to life through investigations, experiments and problem-solving, and helping them understand that making mistakes is all part of learning.

English is another subject I enjoy, especially when it comes to class poetry recitals. There is something special about watching children perform with confidence, expression and creativity while finding their own voice. Whether we are solving challenging maths problems, carrying out exciting science investigations or bringing poetry to life, my aim is to make learning engaging, memorable and enjoyable for every child.

INTERESTS THAT I HAVE

Adventure and creativity are a big part of who I am. I enjoy baking, cooking, shopping and listening to music, but I especially love travelling, discovering different cultures and exploring new places with my family and friends.

AN INTERESTING FACT ABOUT ME

One of my most unforgettable experiences was holding a baby crocodile at a crocodile park in Mauritius!
